Language: English Brand New Book ***** Print on Demand *****.Excerpt from Quarterly Journal of the Royal Meteorological Society, Vol. 32 The rainstorm which visited the East of Ireland on Thursday and Friday, August 24 and 25, 1905, was of such exceptional intensity that some more detailed account of it than has already been published may prove of interest to the Fellows of the Royal Meteorological Society. By way of preface, it may be stated that the glorious summer of 1905 passed away with the passing of July, and that, unlike the preceding three months, August proved for the most part very unsettled, rainy, and cool. The disturbances which reached our shores from the Atlantic were numerous, but, as a rule, of no great intensity, so that they brought wet weather rather than wind-storms. In the Monthly Weather Report of the Meteorological Office for August it is stated that the rainfall was above the average at three-fourths of the stations in Great Britain, and at nearly every station in Ireland, the excess at some western stations being between 2 inches and 4 inches. Thunderstorms also were numerous and...
