## STAR TEK PERSPECTIVES ON TERRESTRIAL TECHNOLOGY (PAPERBACK)

Createspace, United States, 2011. Paperback. Book Condition: New. 226 x 150 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This is a frank discussion on terrestrial technology and free form energy. In this first volume we discuss how to build certain devices using free form energy and why this energy is so important to the planet. We provide information on building Earth Batteries, the Transfiguration Accelerator and other tools anyone can build and use for dowsing, etc. Our goal is to re-educate people about what they once knew but have forgotten about. In this manner we can all provide vital, healthy ways to assist the environment and ourselves as well. Our purpose in writing this book, this is volume 1 of a 2 volume set, is to open the eyes and ears of the public in regard to understanding and using better more advanced ways to have and share an ancient technology that is noninvasive. The sooner that people arrive at the apex of understanding why they have not known about this type of highly charged energy before, the more prone they will be to further investigate, research and put into practice the unlimited ability of this form energy to not only enhance their own lives, but to further Create, develop and apply pure techniques for the betterment of all of mankind. Since the inception of what we consider to be modern science, western science in Greece so many millennia ago, we have pursued knowledge with one eye closed. Sure we can see everything going on around us, but there s no depth to it. Human science has, by necessity, separated itself from the spirit. In order to define itself as an institution of truth, it had to remain separate from religion, which historically has been interested...
