

Tracts on Mechanics, by M.W. Crofton, E. Kensington (Paperback)

Filesize: 1.39 MB

Reviews

It is really an incredible publication which i actually have possibly read through. It really is writter in easy phrases and not confusing. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Jodie Wehner)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1881 Excerpt: .of the thrust is consistent with the equilibrium of CB itself; this will always be the case in the above Problem, as the forces which the walls exert on CD might be vertical and each = 290 lbs., in which case this imaginary thrust along CD would vanish; hence the thrust is not limited here by the equilibrium of CD.) The pressures acting on the wall AB are these: --1. Its weight 8,400 lbs., acting in the vertical line through its centre of gravity, which intersects the base in m, at J ft. from B. 2. The thrust P. 3. The thrust of the lean-to, which suppose to act along its lower edge in the direction po. 4. The resistance on its base, acting through B. 5. The half weight of DC, collected at C. From B drop the perpendiculars, Bn on the direction of P produced, and Bo on the direction of the thrust of the lean-to. Then, taking B for the point whence the moments are measured, calling the thrust of the lean-to Q; and observing that the five above mentioned forces are in equilibrium, and that the moments of two of them--viz., the resistance on the base and the half weight of CD collected at C--are nil, since they act through the point B from which the moments are measured; we have, by the principle of the equality of moments, $Q \times Bo + 8400 \times Bm = P \times Bn$. But, by...
