

Final Environmental Assessment for Brea Power II, LLCs Olinda Combined Cycle Electric Generating Plant Fueled by Waste Landfill Gas, Brea, California (DoeEA-1744)

Filesize: 1.46 MB

Reviews

Good e-book and useful one. It typically does not expense an excessive amount of. I am just delighted to tell you that this is basically the finest book we have read during my very own existence and could be he best ebook for actually.

(Audra Hodkiewicz)

FINAL ENVIRONMENTAL ASSESSMENT FOR BREA POWER II, LLCs OLINDA COMBINED CYCLE ELECTRIC GENERATING PLANT FUELED BY WASTE LANDFILL GAS, BREA, CALIFORNIA (DOEEA-1744)

Createspace. Paperback. Book Condition: New. This item is printed on demand. Paperback. 162 pages. Dimensions: 11.0in. x 8.5in. x 0.4in. The Department of Energy (DOE) prepared this Environmental Assessment (EA) to evaluate the potential environmental consequences of providing an American Recovery and Reinvestment Act of 2009 (Recovery Act; Public Law 111-5, 123 Stat. 115) financial assistance grant to Brea Power II, LLC (Brea Power; formerly Ridgewood Renewable Power, LLC). The grant would facilitate expansion of an existing landfill gas collection system, and construction and operation of a combined cycle power generation facility at the Olinda Alpha Landfill in Brea, California. DOE's proposed action is to provide 10 million in financial assistance in a cost-sharing arrangement with the project proponent, Brea Power. The cost of the project is estimated to be about 84 million. The primary objective of Brea Power's proposed project is to maximize the productive use of substantial quantities of waste landfill gas generated and collected at the Olinda Alpha Landfill in Brea, California. The project proponent determined that utilization of the waste gas for power generation in a combustion turbine combined cycle facility was the best use for the gas. The electricity generated from the proposed project, a net output of approximately 280 kilowatt-hours of electricity annually, would be distributed to the local power grid via a new electric transmission line to be installed by the local utility company. Brea Power would expand the existing gas collection system at the landfill and build the new gas-to-energy facility across the street from the existing gas-to-energy facility. Once the new facility is operational, the existing facility would be used only as a contingency. This EA evaluates 14 resource areas and, after proposed mitigation measures, identifies no significant adverse environmental impacts for the proposed project. Beneficial impacts to the nation's energy efficiency...
